DATADOT APPLICATION – GUIDELINES & SUGGESTIONS

DataDots can be quickly and easily applied to almost any high value item such as: skis, snowboards, iPods, laptop computers, electronic equipment (e.g. stereo, video, photographic), firearms, etc.

PLANNING

1. List the assets to which DataDots will be applied.
2. It is recommended to apply multiple DataDots to any one asset. To make life difficult for a would-be thief, apply the DataDots in hidden and obvious locations on the asset. As a “Rule of Thumb”, use a minimum of 10 DataDots per asset.
3. Use all DataDots when the package is opened. It is intended to be a single-use package as the adhesive begins to cure when opened.
4. Decide where you are going to mark your assets with DataDots.
5. Make sure the asset is clean from grease and dirt.

HOW TO APPLY DATADOTS

1. Shake container vigorously before opening. Open the container, remove the seal, and stir the contents with the applicator.
2. Dip the applicator brush into the mini-pot getting both adhesive and dots.
3. Apply the dots and adhesive on the surface of the item to be marked. Allow 30 minutes for the adhesive/DataDot mixture to become tack free. The adhesive fully cures in 24-48 hours. The adhesive dries nearly clear and contains an ultraviolet trace, which aids law enforcement in DataDot detection.
4. We strongly recommend that you DataDot all valuable items. This will help to deter thieves and protect your belongings.
5. Use the self-adhesive warning labels at your discretion on high-value items to make it clear that your property is protected.

HELPFUL HINTS

1. Do not apply DataDots where they might interfere with any mechanical movements.
2. Avoid application to cosmetic surfaces where visual aesthetics are important.
3. Apply DataDots to low usage or seldom-handled areas – both hidden and visible.
4. Be sure to register your unique PIN at the DataDot online registration site (www.datadotusa.com). Registration of your PIN ensures that law enforcement and insurance companies can be made aware of the identification of your assets in the event of theft. In the event that any of your assets are stolen, remember to include that they have DataDots applied in your police report. If you do not have access to the Internet, the information can be mailed to DataDot USA for registration purposes.
